Aditya Kaushik

Bengaluru, Karnataka, India
+91 9008596707 | aditya.kkmj@gmail.com | LinkedIn | GitHub

Education

R V College of Engineering Bengaluru
B.E. in Artificial Intelligence and Machine Learning *CGPA: 9.37* 2023 - 2027

Indian Institute of Technology, Madras
B.S. in Data Science and Applications *CGPA: 8.69 | Project CGPA: 9.25* 2024 - Present

Experience

Samsung R&D Institute India (SRIB) Bengaluru, IN
Developer Intern May 2026 – Jul 2026

- Engineered an AI-powered campaign recommendation assistant with LangGraph, SQL, and Amazon Redshift APIs to retrieve historical sales, product, and customer data, enabling marketers to generate campaign recommendations through an internally hosted LLM.
- Developed a voice-based telesales agent for Samsung Finance Plus, integrating Whisper (STT), Piper (TTS), Silero VAD, and Ollama-hosted LLMs to support conversational smartphone financing.

Samsung PRISM (Samsung R&D Institute India) Bengaluru, IN
Research Collaborator May 2025 – Jan 2026

- Developed a speech processing pipeline with Python, Librosa, and PyTorch on the AMI corpus containing 100+ hours of audio; extracted acoustic features and trained multiple deep learning models for near-field vs. far-field classification.

WIRIN – The WIPOD (Collaboration with IISc and WIPRO) Bengaluru, IN
Project Associate Apr 2024 – Dec 2024

- Transformed 25+ design screens into reusable React and Tailwind CSS components, integrated Flask APIs and WebSockets, and reduced page load time by 30%.

Projects

Quarks Finance *React, TypeScript, Tailwind, Next.js, Python, SQLite* Live Demo | GitHub

- Created a full-stack platform for portfolio tracking and strategy backtesting targeting NSE India retail investors.
- Optimized API calls and state management, reducing dashboard data latency by 30%.

Hatch – Hackathon Management Platform *Flask, MongoDB, TypeScript* Live Demo | GitHub

- Engineered workflows for registration, team formation, submissions, evaluations, and event management.
- Developed Flask APIs and administrative panels, reducing manual coordination effort by 40%.

Kxetra UPSC *Python, Flask, HTML, CSS, JavaScript, MySQL* Live Demo | GitHub

- Automated structured note generation on Notion from daily news and video content through a Flask-based UPSC preparation platform.
- Established automated testing and mock interview workflows supporting 20+ questions per session.

Bio-Inspired Transport Network Optimization *JavaScript, p5.js, SMA* Live Demo | GitHub

- Simulated transport network optimization with 500+ agents using the Slime Mould Algorithm.
- Visualized network evolution and convergence in the browser to demonstrate SMA behavior.

Technical Skills

Languages: Python, C++, Java, SQL, HTML/CSS
Frameworks & Libraries: React, Next.js, Vue.js, Flask, Tailwind CSS, Bootstrap
AI & ML Tools: PyTorch, LangGraph, Pandas, OpenCV, Librosa
Databases: MySQL, MongoDB, SQLite, Amazon Redshift
Tools: Git, Ollama

Competitive Programming

LeetCode: Max Rating **1732**, 300+ problems solved (profile)
Codeforces: Max Rating **1340 (Pupil)**, 200+ problems solved (profile)

Achievements

Winner, WHITEHACK 1.0 – Built Hatch, a platform used to manage the hackathon workflow.
Course Top Performer – Among top performers in BS Data Science and Applications, IIT Madras.

Publications & Certifications

Slime Mould Algorithm (Published in METSZET, May 2025) Publication
NPTEL – Data Science for Engineers (Silver Elite, Top 5%ile) Certificate
